

There is a better plan for temporary and long-term flood protection.

STOP THE DESTRUCTION OF THE EAST RIVER PARK!

NYC plans to bulldoze all of East River Park next year. They will bury the entire park with 10 feet of landfill, and “rebuild the park” over it. We will lose our jewel of green space for years. We will breathe dirt and have no shade. Trees uprooted, birds chased away, nature destroyed... No playing fields, no picnics, no trees, no nothing! The City imposed this nuclear option for reasons yet to be uncovered, and is forcing it down our throat!

CITY COUNCIL CARLINA RIVERA CAN STOP THIS!

If she says no to this destructive plan, the City Council will vote with her because the park is in her district.

Call your representative! (212-677-1077)

Write a letter! district2@council.nyc.gov

Go to public meetings and express your opinion!

(Meetings announced on C. Rivera’s facebook page)

- Tell her you want her to vote NO on the City’s “preferred option”
- Tell her you want real independent experts to look at all options on the table, and to evaluate the impact of destroying 60 acres of land.
- Tell her you want the City to revisit the less destructive option that was most liked by the community: a berm along the FDR!
